AAGPS SPORTS UPDATE – NEW AAGPS WEBSITE & APP

The AAGPS are pleased to announce the launch our new look website and the implementation of an AAGPS app for all sporting fixtures from 2022. The website is a key part of our new integrated sports management platform, developed in conjunction with JARO Sports.

This platform consists of three components:

- The new public Website
- A custom Mobile App for member schools and the public, which can be found in the Apple Store or on Google Play which allows access to all fixtures and results in the palm of your hand, wherever you may be
- An Administration platform

New Features:

- Easy navigation into every key section directly from the homepage via the dynamic season panels, or the quick navigation links in top right-hand corner
- Combined calendar of fixtures and events directly accessible from the homepage.
- Real-time results and ladders for each sport in each division, updated as soon as captured in the App.

- Links to full score details in platforms like MyCricket, with summary results displayed on the website.
- Past results available within each sport.
